Figure 1 | CD8 T-cell identities and exhaustion-associated transcriptional programs

GSE225063 | Baseline + week-4 tumor atlas: 36,185 cells | Author embeddings, cluster IDs and scores retained

e–h: Nivo + Rela, week-4 tumor CD8 cells (n=7,445; 11 patients). e–h: within-panel 2nd–98th percentile color limits; high scores/expression plotted last.
Dot size: detection fraction; heatmap/dot color: program-wise/gene-wise z-score across nine clusters (display ±2).
